

THIS FORM MUST ACCOMPANY ALL HORSES SHIPPING INTO THE PRINCETON SHOW JUMPING FACILITY

By signing this letter I hereby certify that none of the horses in my care have been in direct contact or stabled with any horses that have received a positive test for the EHV-1 virus. I also certify that none of the horses in my care have been housed in any current quarantined facility. I also certify that I will continue to follow all biosecurity precautions set forth by Princeton Show Jumping.

Print Name _____ Date ____ / ____ / ____

Name of Barn _____ Arrival Date _____

Address of horses origin prior to coming to the Princeton Show Jumping facility:

In effect until further notice, no horses will be allowed to ship onto the Princeton Show Jumping property without a health certificate within 48 hours of arriving. Princeton Show Jumping is asking all equestrians to enact biosecurity protocols and be proactive and responsible for their horses, including daily temperature charts. Do not bring any horses that come from quarantined farms onto Princeton Show Jumping property.

An integral part of a showing environment includes healthy horses. Exhibitors, especially those traveling long distances, can contribute to that healthy environment by following some basic recommendations listed below.

1. A current negative coggins test. Please renew before it expires, and not just before it is necessary to leave the state. It is strongly recommended that all horses be vaccinated for Equine EHV- 1 (either modified live or killed vaccine) no sooner than 7 days prior and no later than 90 days prior to entering the USET Foundation. Most EHV-1 vaccines are only considered effective for 90 days. Check with your veterinarian about which vaccine you should use.
2. A health certificate or statement on licensed veterinarian letterhead within 48 hours is required for all horses shipping onto the property. All horses should be able to produce proof of vaccine, preferably labeled on these health certificates.
3. You should be able to document your horses' normal temperature before arrival. Please do not ship horses with elevated temperatures. It is recommended that you establish a log of temperatures taken at least twice daily. If there is an elevated temperature for more than a 24 hour period, please consult your local veterinarian immediately.
4. Every effort should be made to minimize stress and commingling of horses shipped long distances. Extra hours on a horse van, or moving from stable to stable, is the fastest way to compromise your horses' and your neighbors' horses' health.

"Thank for your cooperation in adhering to this important protocol so we can keep your horses healthy".
- Andrew H. Philbrick – Princeton Show Jumping
